Stefano Lepri was born in Florence, Italy, in 1966. He received his PhD in Physics from the University of Bologna in 1996.

He is researcher at the Istituto dei Sistemi Complessi CNR-ISC in Florence.

His research interests range from the theory of nonlinear, chaotic and complex systems and the statistical mechanics of out-of-equilibrium processes, and in particular to anomalous transport and diffusion.

He is (co)author of about 90 papers in international peer-reviewed journals and presented many invited talks to Conferences and Schools worldwide.

He has been Visiting Scientist at several institutions, including the ENS-Lyon, the EPFL in Lausanne, Potsdam University etc.

He is Editor of "Chaos, Solitons and Fractals: The interdisciplinary journal of Nonlinear Science, and Nonequilibrium and Complex Phenomena" and of "Physics Open".

Since 2016 he is Lecturer of the course "Dynamical systems theory" for the MSc Degree in Physics and Astrophysics of Florence University.
